

AI Invoice Generator

The moment a job is marked done, a branded, correctly priced invoice goes to your client with a pay link, and it lands in your ledger with its due date. No one has to build it by hand.

Designed by Jonathan Munteanu

~10 HRS/MO

of invoicing handed off

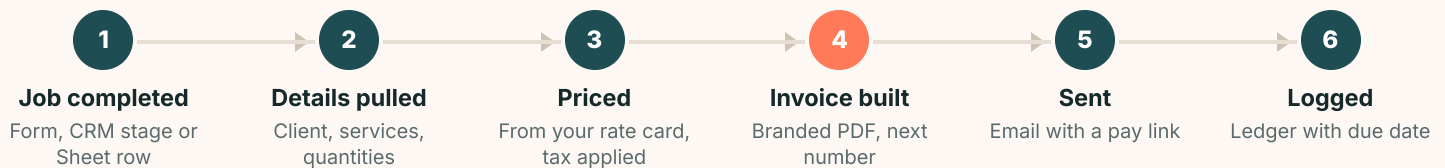

Based on 40 invoices a month at ~15 minutes each by hand

ILLUSTRATIVE

THE PROBLEM

Invoicing happens at the end of the day, after the real work. Someone copies client details, looks up prices, does the math, formats a document, writes the email and logs it. It gets pushed to Friday, mistakes slip in, and every day an invoice waits is a day later you get paid.

HOW IT WORKS

WHAT YOU GET

Same day

invoices go out when the job is done, not at the end of the week

1 ledger

every invoice, amount, due date and status in one place

Pay link

on every invoice, so clients can pay in a click

0

prices typed by hand or set by the AI

GUARDRAILS

- **Your prices only.** Amounts come from your rate card and line items. The AI never sets a number.
- **Clean numbering.** Sequential invoice numbers with duplicate checks.
- **You choose the send.** Review each invoice first, or let it send on its own.

WHAT THE SYSTEM DOES

- Starts the moment a job is marked complete
- Pulls the client and line items from your records
- Prices every line from your own rate card, then adds tax and discounts
- Builds a branded, numbered PDF invoice
- Emails it with a pay link and logs it in your invoice ledger

BUSINESS VALUE

ILLUSTRATIVE ROI

If building and sending an invoice takes about 15 minutes by hand:

40 invoices a month ≈ 10 hours

That's more than a full workday a month back, and invoices go out the day the work is done, which is the day payment can start.

Illustrative math, not a measured client result.

CUSTOMIZABLE FOR YOUR BUSINESS

- Your rate card and tax rules
- Your branding and terms
- Your trigger (form, CRM, Sheet)
- Stripe, QuickBooks or Xero
- Your payment terms (Net 15, 30)
- Deposits and partial payments
- Review first or auto-send
- Pairs with overdue follow-up
