

AI Prospecting & Outbound System

Finds the right decision-makers, researches each company's website, and loads a personalized outbound email into your sending tool, ready to go.

Built and tested by Jonathan Munteanu

~10 SEC

per personalized email

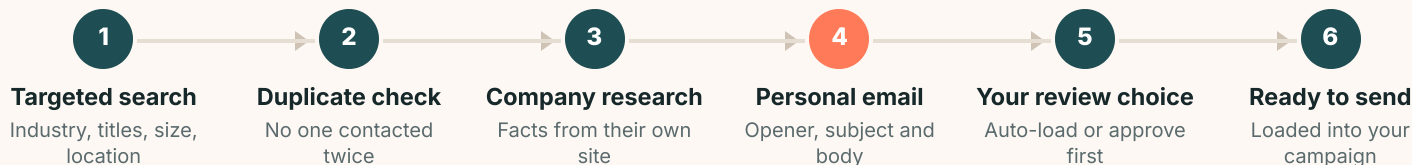

That pace puts 100 researched, personal emails in your campaign in under 20 minutes

VERIFIED IN TESTING

THE PROBLEM

Outbound only works when it's about the person reading it. That means finding the right contact, looking up their company and writing a first line that's actually specific. By hand, that's several minutes a prospect, so most teams send something generic or only reach a handful a day.

HOW IT WORKS

VERIFIED IN TESTING

~10 sec

per lead, from search result to a personal email loaded in Instantly

94

leads with verified emails added from one real estate search

~7 sec

to pull 100 contacts, for about \$0.22

0

duplicates added when the same search was run again

GUARDRAILS

- **Grounded writing.** The AI can only use facts found on the prospect's own site. No invented news, no generic compliments.
- **Clean lists.** Verified emails only, checked again on import, and duplicates are blocked.
- **You keep the final say.** One switch sets auto-load or approve-first, and nothing goes out until you turn the campaign on.

WHAT THE SYSTEM DOES

- Pulls decision-makers who match your targeting, verified emails only
- Skips anyone already on your list
- Researches each company's own website
- Writes a personalized opener from real details it found
- Loads each lead and email into your outbound tool, or holds it for your approval

BUSINESS VALUE

ILLUSTRATIVE ROI

If finding a contact and writing a real first line takes about 7 minutes by hand:

100 prospects ≈ 11.7 hours

This system turns that into a review task. Estimated AI research and writing cost: under \$0.01 per lead.

Illustrative math, not a measured client result.

CUSTOMIZABLE FOR YOUR BUSINESS

- Your ideal customer
- Your lead source or database
- Your offer and voice
- Your CRM (HubSpot, GoHighLevel)
- Your outbound platform
- Your approval process
- Runs on a schedule
- Your proof point in every email
