

Overdue Invoice Follow-Up

Checks every open invoice each morning. Anything past due gets the right reminder at 7, 14, 21 and 28 days, and it stops the moment it's paid. No more digging through accounts or awkward chasing.

Designed by Jonathan Munteanu

3+ HRS/MO

back from chasing late payments

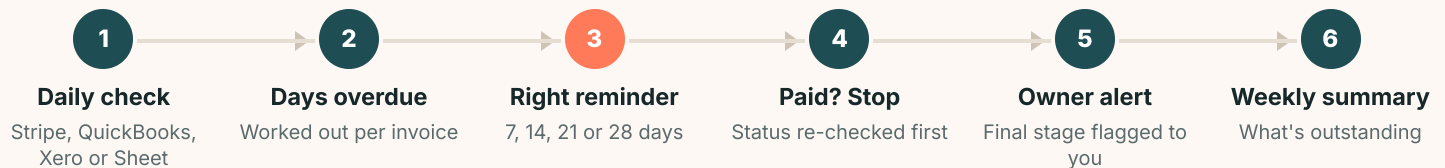

Reminders at 7, 14, 21 and 28 days that stop the moment an invoice is paid

ILLUSTRATIVE

— THE PROBLEM

Chasing late payments is nobody's favorite job, so it gets skipped. Someone has to check which invoices are overdue, work out how late each one is, write a reminder in the right tone and remember to do it again next week. Every week it slips, your cash sits in someone else's account.

— HOW IT WORKS

— THE REMINDER SCHEDULE

- 7** **Friendly nudge.** A quick heads-up with the invoice attached.
- 14** **Reminder.** Amount, due date and a one-click pay link.
- 21** **Firm notice.** Clear, polite and specific about next steps.
- 28** **Final notice.** Sent after your approval, and you get an alert.

— GUARDRAILS

- **Never chases a paid invoice.** Payment status is checked again right before every email.
- **Your tone, your timing.** You approve the wording and choose the days.
- **You stay in control.** The final notice can wait for your OK.

— WHAT THE SYSTEM DOES

- Checks your payment system or invoice sheet every morning
- Works out how many days each open invoice is overdue
- Sends the reminder that matches the stage, in your tone
- Re-checks payment status before every send
- Alerts you at the final stage and logs every touch

— BUSINESS VALUE

ILLUSTRATIVE ROI

If checking and chasing one overdue invoice takes about 10 minutes:

20 overdue invoices a month ≈ 3+ hours

The bigger win is consistency. Every late invoice gets followed up on time, every time, so money comes in sooner.

Illustrative math, not a measured client result.

— CUSTOMIZABLE FOR YOUR BUSINESS

- Stripe, QuickBooks, Xero or Sheets
- Your reminder days
- Your wording and tone
- Late fee language, if you use it
- Text reminders as well as email
- Skip lists for key clients
- Alerts to Slack, text or email
- Pairs with the invoice generator
