

AI Quote & Proposal Generator

Turns a quote request into a priced, branded proposal PDF and a ready-to-send email in under 20 seconds. Every price comes from your own rate card, never from the AI.

Built and tested by Jonathan Munteanu

<20 SEC

per proposal, ready to send

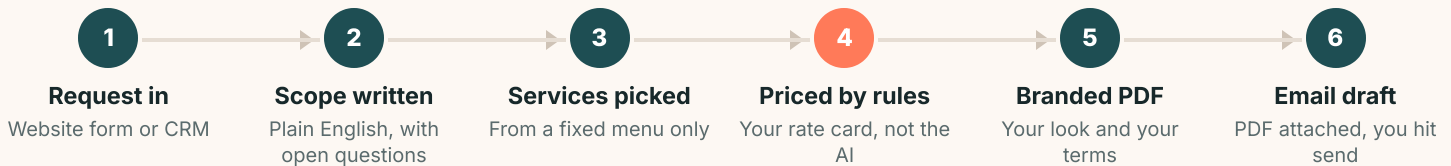

Request in → priced from your rate card → PDF and Gmail draft ready

VERIFIED IN TESTING

THE PROBLEM

A quote request means someone stops what they're doing, reads the request, works out which services fit, checks the rate card, does the math, builds a document and writes the email. It's slow, it depends on who's doing it, and the prospect waits.

HOW IT WORKS

VERIFIED IN TESTING

~17.5 sec

from request to finished proposal and email draft, end to end

10.9 / 12.5s

processing time on the last two test runs

4 outputs

from one run: scope, priced quote, PDF and Gmail draft

0

prices set by the AI. An off-menu pick stops the run

GUARDRAILS

- **The AI never sets a price.** It only chooses from your service menu. Code does the math, and an off-menu pick stops the run instead of guessing.
- **Honest about unknowns.** Every scope lists its assumptions and open questions.
- **You keep the final say.** Draft-only Gmail access: it can't read your inbox or send.

WHAT THE SYSTEM DOES

- Reads the request and writes the scope in plain English
- Lists its assumptions and open questions
- Picks services from your fixed menu, then prices them from your rate card
- Applies size tiers, extra locations and bundle discounts
- Builds a branded PDF and a Gmail draft with it attached

BUSINESS VALUE

ILLUSTRATIVE ROI

If putting a proposal together takes about 30 minutes by hand:

20 quotes a month = 10 hours

That's more than a full workday a month turned into quick reviews, and pricing stays consistent no matter who's quoting.

Illustrative math, not a measured client result.

CUSTOMIZABLE FOR YOUR BUSINESS

Your rate card (even a Google Sheet)

Your services and tiers

Your discounts and minimums

Your branding and terms

Your intake form or CRM

Your email voice

Your approval process
